Occurs In:			
Description <p>If the CONDOR_TMP and CONDOR_EXEC are not setup in the environment correctly, you get following error messages. This is from invoking the dirname command without any argument (in case of env variables being empty) We should handle such uses case more gracefully.</p> <pre>-bash-3.2\$ setup jobsub_tools v1_3_1_2 dirname: missing operand Try `dirname --help' for more information. dirname: missing operand Try `dirname --help' for more information. -bash-3.2\$ /grid/fermiapp/products/common/prd/jobsub_tools/v1_2x/Linux-2/bin/setup_condor.sh</pre>
